Prep for HLTCPR211A - Perform CPR - refresher course

In order to be properly prepared to take the Perform CPR (refresher) course (HLTCPR211A), you need to ensure that you have completed the following preparation **before** the course date:

- 1) Have a current copy of any nationally recognized First Aid manual, and have reviewed it completely
- 2) If your manual does NOT contain the post-2010 revisions (DRSABCDs), you can download an update sheet from the RESOURCES section of the website (www.goprotownsville.com) or by following this direct link – <http://www.goprotownsville.com/resources/FAW/Errata.pdf>.
- 3) Have completed the Knowledge Review attached to the email you receive from Go Pro Townsville. If you did not receive a copy of the Knowledge Review, copies are available from the RESOURCES section of the website (www.goprotownsville.com) or by following this direct link – <http://www.goprotownsville.com/resources/CPR/review.pdf>. (I will need to retain a copy for my records, so please bring a copy with you)

If you have any questions regarding pre-requisites, or the course in general, please contact me any time.

Cheers,
Andrew
